A piece of fruit or a grand buffet? An aquamarine crayon or the 64-color Crayola box of crayons with a sharpener? By combining the unique qualities of individual items, we usually create a more desirous and valuable product or offering; this enhancement of value through diversity can also be found in our own offices. ‘Successful Lawyering in a Diverse Society’ was developed by the Professionalism Center of The Florida Bar. This interactive program will create an awareness of the importance of diversity and the financial impact it can have on an organization. The facilitator will lead attendees through introspection, and small and large group exercises that augment their awareness and knowledge of our diverse society. As a result of attending and participating in this program, you will gain a greater awareness of “valuing diversity” in your office and in the legal profession, and explore your personal beliefs about diversity.</p>
